

Projects (Water / Wastewater)

Adrmore Filter Station - DeltaV Rollout
 Ardmore Filter Station - Powder Activated Carbon Upgrade
 Ardmore Filter Station - 11kV Supply Upgrade
 Ardmore Filter Station - Disinfection Plant Upgrade
 Ardmore Filter Station - UPS Specification and Upgrade
 Huia Filter Station - UPS Upgrade
 Te Aroha WWTP - Station Upgrade
 Hamilton Water Filter Station - Station Upgrade
 Mangere WWTP - 11kV Future Planning
 Mangere WWTP - Digester 8 11kV Upgrade
 Mangere WWTP - EACS 11kV Upgrade
 Mangere WWTP - Biosolids Control System Upgrade and Migration
 Kawakawa Bay WWTP - Plant Upgrade
 Tamavua Water Treatment Plant - Plant Upgrade
 Waitoa Water Treatment Plant - Plant Upgrade
 Huia Filter Station - Switchboard Upgrades
 Tirau WWTP - Plant Upgrade
 Mangere WWTP - Black Start
 Huia Raw Water Pump Upgrade
 Lower Huia Pump Station Electrical and Control System Upgrade
 Mt Wellington WWPS - Upgrade
 Wellsford Filter Station - Plant Upgrade
 Warkworth Filter Station - Plant Upgrade
 Huia Filter Station - Sludge Upgrade
 Ardmore Filter Station - Rapid Restart Project
 Ardmore Filter Station - Alum Dosing Upgrade
 Rotorua Wastewater Trial Plant
 Waitoa WWTP
 Te Kauwhata WWTP - Plant Upgrade
 Onehunga Filter Station - Chlorine Plant Upgrade

Practical engineering **solutions.**

Culture

At McMahon our culture originates with the personal values and principals of our small team. We are good people, we are family people and we are honest people.

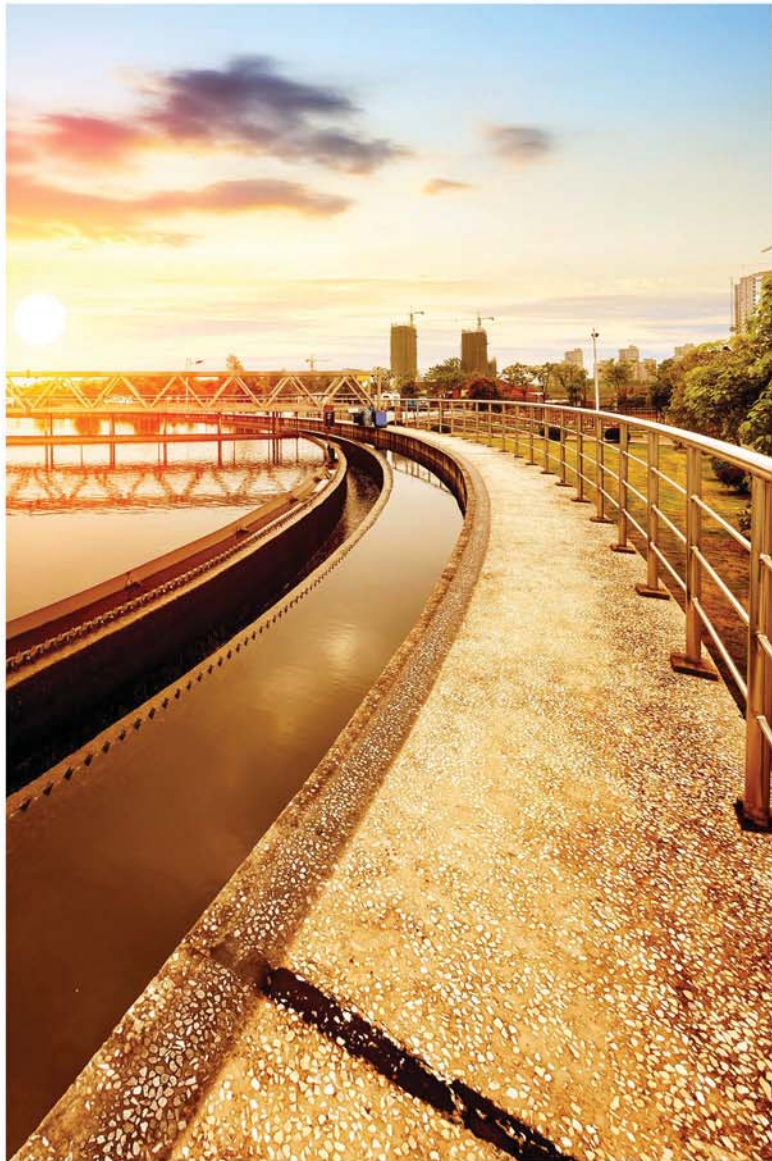

Solutions

Principally we strive to deliver practical engineering solutions. Our team have a history of progression through trade and university education and as design and delivery professionals, we understand the economics and practicalities of modern engineering practice. We are the bridge between our clients and successful engineering outcomes.

Commitment

McMahon are committed to delivering progressive engineering solutions for the betterment of our clients, our industry, and ourselves. We take ownership of our output and pride ourselves as project delivery specialists. Our four directors have amassed over 120 years of collective experience from in excess of 1600 projects and 100 unique clients throughout New Zealand, Australia and the Pacific.

Evolution

We evolve! We recognise that our world is changing through a progression of innovation, technology and philosophy. We embrace change and we foster a culture of personal and professional development through knowledge, education and experience.

Experience

Our team are experienced electrical and control system engineering professionals. We have considerable experience with the delivery of projects across a range of industry sectors as both lead and sub consultants. Our team at McMahon offer tangible value on every project!

Accountability

We hold ourselves accountable. As a small organisation with a history dating back 30 years, our commitment and responsibility to clients is testament of our continuing service to the very clients who have entrusted McMahon as delivery partners.

Services

Conceptual Design, Functional Descriptions, (C)(E) HAZOP Studies, Safety in Design (SiD), Health and Safety, Tender Specifications, Detailed Design, Contract Preparation, Contract Administration, Site Supervision Commissioning, O&M Documentation, Asset Identification.

Collaboration

We work in collaboration with you! We advise, we consult, and most importantly we listen. We understand that the key to delivering successful engineering projects is teamwork.
